ADaM Data Port Reset Procedure

I.   Purpose:

Describes the procedure for Adam data port reset.

II.   Cautions and Hazards:

None.

III.   Requirements:

None.

IV.   Procedure:

A.   Steps:

1. Open right side rack doors and pull out the keyboard drawer.

2. Press the **enter** key two times. *adam-net2 login:* should appear on the screen.

3. Type **root** and press **enter**.

4. *password:* should appear on the screen. Type **cy4lock** and press **enter**. (The letters for the password will not show up on the screen as you type them.)

5. A message containing TVI925 should appear on the screen. Press **enter**.

6. At this point you should be logged in. If the *adam-net2:* prompt does not appear, repeat steps 1-5.

7. Type **cd/files0/ADaM** and press **enter**. The *adam-net2:* prompt should appear.

8. Type **./do_ports** and press **enter**. The *adam-net2:* prompt would appear.

9. Type **logout** and press **enter**.
